

A Unisys Company

Environment Policy

iPSL recognises that it has a responsibility to act in a way that manages the impact of our operations on the environment.

Across the company we are committed to actions on the environment and the prevention of pollution by means of a programme of continuous improvement. In particular we will:

- Assess and manage the environmental impacts of our operations
- Invest in environmentally friendly and sustainable products and services wherever it is relevant and cost effective to do so
- Manage our environmental responsibilities including full compliance with UK and EU regulations as applicable, and keeping abreast of any new emerging legislation as this becomes available
- Exercise product/equipment husbandry in conjunction with our suppliers to get the optimum performance out the items
- Undertake a regular audit process and monitor continuous improvement
- Manage energy usage and encourage awareness amongst all staff to reduce the environmental impact of their activities by adopting good housekeeping practices
- Communicate our policy to employees, customers and suppliers and other interested parties

Please ensure that we all understand our collective responsibility of the Environmental Policy

Many thanks

Jim Large
CEO
